EDUCATION

Central China Normal University (CCNU)| Wuhan, China *Sept. 2022- Jun. 2026*

- Candidate for Bachelor of Management in Information Management and Information System
- GPA: 3.69/5.0; Average Mark: 89.03/100; Major GPA: 3.73/5.0; Major Average Mark: 89.18/100
- Rank: 1/32

RESEARCH EXPERIENCE

Cost-Sensitive Guided Graph Neural Network on Healthy Insurance Network *Apr. 2024-Present*

Research Assistant, Mentored by Dr. Fei Xiao, CCNU

- Constructed a novel hospital-patient-disease network using coupled-node techniques and designed metapaths based on fraud patterns and entity attributes
- Redesigned the loss function by integrating cost-sensitive learning and expected loss with cross-entropy to ensure the model accuracy while concerning the cost loss
- Applied RFM-based feature engineering to enrich node attributes and enhance representation learning, leading to a 126% improvement in cost-sensitive performance

InterLibrary Interaction among Major Universities in Hubei Province Based on Gravity Model and Social Network Analysis (SNA) *Sept. 2024-Jan. 2025*

Research Assistant, Mentored by Prof. Min Zhang, CCNU

- Reviewed literature on urban gravity models to seek theoretical support for adapting the model to inter-library
- Collected information on 27 university libraries in Hubei Province, constructed adjacency matrices, and built interaction networks using Ucinet and Gephi
- Analyzed the structural patterns of inter-library relationships using SNA indicators, such as Centrality, Density, and Average Path Length, and the CONCOR block model
- Performed regression analysis to identify official cooperation intention constraining collaboration

Operation Research on Dual-Command Cycle in Split-Platform AS/IS

Research Assistant, Mentored by Associate Prof. Guangmei Wu, CCNU *May 2024*

- Analyzed operational efficiency of 3D compact AS/RS under I/O dwell-point and random storage strategies
- Developed a dual-command travel time model to represent the coordinated horizontal and vertical platform movements and derived the optimal rack dimension parameters
- Used Monte Carlo simulation to identify a 27% improvement in average travel time under the dual-command strategy compared to the single-command strategy

INTERNSHIP

Research Intern of AIoT project, ***School of Computing,*** **National University of Singapore |** Singapore
May 2025-Jul. 2025

- Coordinated progress of a 4-member team, including hardware assembly, model training, UI design, and front-end development
- Used ResNet for image feature extraction and LightGBM for food nutrient identification and validated via Raspberry Pi camera with 100% accuracy in the final demonstration session
- Conducted IMU sensor data collection for real-time motion classification using feedforward networks

- Independently designed a React-based web interface with data dashboard, food analysis, and motion analysis modules, and integrated real-time motion classification and calorie calculation via WebSocket connections to backend systems
- Developed a simplified TCP sliding window protocol to resolve the broadcast data loss and misordering issues during IMU sensor transmission in Micro Bit

AI Development Intern, **Sinolight (Guizhou) Industrial Internet Co., LTD. |** Beijing, China

Jul. 2024-Aug. 2024

- Labeled performance indicators across subsidiaries and business units using LLMs and extracted corresponding data via SQL to support model queries
- Built a knowledge graph with over 3,000 indicators using GraphRAG to extract and link indicator, business, and subsidiary
- Tuned few-shot examples and model parameters to improve numerical reasoning and reduce hallucination in data-driven responses, enhancing the model's understanding of business relations
- Visualized the indicator network with Gephi and dynamically highlighted anomalous areas

COMPETITION & PROJECT EXPERIENCE

Team leader, **LearnGo Development Project,** 2025 Mobile Application Innovation Contest *May 2025-Jul. 2025*
Software Copyright of LearnGo App V1.0 (Registration No.: 2025SR1265534)

- Led the design of the LearnGo prototype using Figma and improved user experience during implementation
- Independently developed front-end and back-end systems, including animation effects and model training

Team member, **IGO Data-Driven Project,** *Data Science Course of HKU Business School* *Jan. 2024-Feb. 2024*

- Conducted feature engineering and data cleaning based on RFM metrics to enhance model learning effectiveness
- Compared Graph Attention Network (GAT) for supervised user classification with XGBoost and Random Forest, outperforming XGBoost and Random Forest and achieving 83% accuracy

CERTIFICATES AND AWARDS

Second Prize of the 2025 Mobile Application Innovation Contest, Central China Region *Aug. 2025*
App Development with Swift Certified User Badge *Nov.2024*
Huawei Cloud Developer Certification *Jun. 2024*
Third Prize for Type C in 2024 National English Competition for College Students (NECCS) *May 2024*
National Computer Rank Examination-3 (Database) *Mar. 2024*
CCNU Merit Student (Top 20% in academic performance) *Dec. 2024 & Dec. 2023*
CCNU Shuren Scholarships (Top 30% in academic performance) *Oct. 2024 & Oct. 2023*
Third Prize of the 15th National Undergraduate Mathematical Competition *Dec. 2023*

SKILLS & OTHERS

Computers: Python (3yrs), SQL (3yrs), MATLAB(3yrs), SPSS (2yrs), UCINET/Gephi(2yrs), Vue3&React(2yrs), Java (1yr), C(1yr), Xcode(1yr), Spring Boot(1yr), PyTorch (1yr)

Language: Mandarin(native), Cantonese(native), English(advanced)

Sports: Volleyball (member of a star team for two years and silver team in school-level league), Badminton (6 years), Tennis(3 years)

Other: Deputy Director of the Activities Department of the Student Union, School of Information Management, CCNU *Sept. 2022-Jun. 2023* Member of the Student Innovation Department in 11th Youth League Committee and

Student Union, School of Information Management, CCNU *Sept. 2022-Jun. 2023,* CCNU Volunteer Peer Tutor for Linear Algebra *Oct. 2023-Dec. 2023*
